CREATORS OF CONVEYOR BELTS

FABRIC-REINFORCED PU / PVC CLEATS

FABRIC-REINFORCED CLEATS

- **HIGH QUALITY PVC OR PU**
- **ALSO IN FOODGRADE QUALITY**
- **VARIETY OF COLOURS AND SIZES**
- **STRAIGHT AND BENT**
- **SPECIAL DESIGNS**
- **TIME AND COST SAVING**
- **LOOSE OR FITTED**
- **QUICK SUPPLY**

Extra high, extra strong: cleat BK225 (225 mm high), is often used for large products or heavy loads.

Fabric-reinforced cleats are commonly used in applications that require cleats of additional strength. You can produce your own, but outsourcing this is often more cost-effective. BTE supplies PVC and PU fabric-reinforced cleats.

PU: EXTRA WEAR-RESISTANT AND COLD PROOF

These flights are strongest when made of PU. This material is rigid and at a hardness of 92° Shore A they are highly wear-resistant, down to temperatures of -30°C. They have a long lifespan, even under extreme conditions. These cleats do of course meet the FDA and EU guidelines for food contact, as do the white and blue PVC fabric cleats.

In addition to the cleats in the overview on the next page, we can also produce special fabric-reinforced cleats for you. Examples include cleats with a diamond profile for less product adhesion and extra high cleats, for the harvest of cabbage for example.

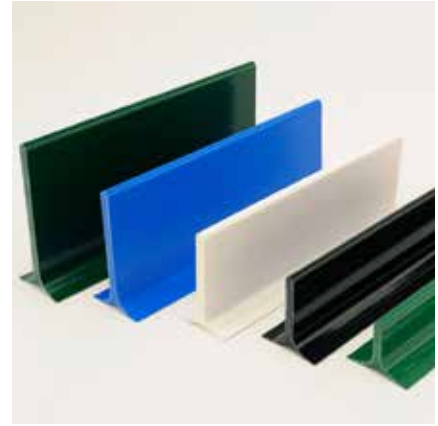

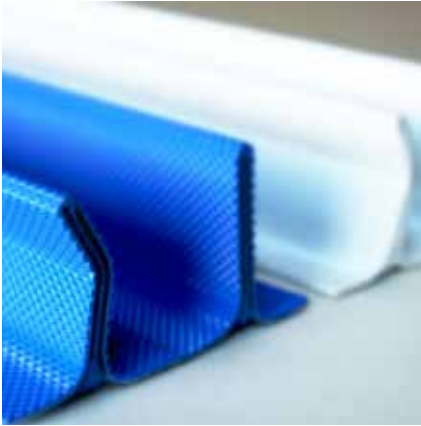

FAST, HIGH-QUALITY AND COMPETITIVELY PRICED

Thanks to mechanisation and carefully selected materials, BTE produces large series of fabric-reinforced cleats, which are offered at a competitive price and a high and consistent quality.

We will be happy to assist you in selecting the correct design and material of the cleat, which of course depends on the application and type of processing.

Separate cleats are available in lengths of up to 2 metres, which can, of course, be cut to size. And, as you know, we can also fit them on the belt material in accordance with your specifications.

OUTSOURCING: IT PAYS OFF

OUTSOURCING PAYS OFF

Making your own fabric-reinforced conveyor belt is labour-intensive and consumes a lot of materials. Here at Bandtransport Europe BV we specialise in all types of processing conveyor belt materials and produce these quality flights in larger volumes and at competitive prices, in various colours and finishings.

Your staff can focus on other tasks, whilst you save wage and machine costs.

SPECIAL PRODUCTS

Apart from our standard range BTE offers special fabric-reinforced cleats. For example:

- Fabric-reinforced cleats with a diamond profile for better release of products.
- Bent cleats with a height over 120 mm (e.g. type BK225, see picture).

OUR RANGE OF FABRIC-REINFORCED CLEATS

BANDTRANSPORT EUROPE

Bandtransport Europe (BTE) has a history of more than 30 years in conveyor belt fabrication. Originated from Fabreeka Bandtransport in 2010 we have a rich tradition of development and production of conveyor and process belts. We are continuously working to further improve our products by offering quality, flexibility, promptness and reliability. Satisfied customers, healthy employees and sustainable products and investments are the basis of a healthy company. In order to achieve this, BTE works with a management system according to the norms ISO9001, ISO14001 und OSHAS18001.
